Subject: Comment against the proposed Dewey - Burdock UIC Project

We are now entering another of many severe periods of severe drought in South Dakota; Governor Dugaard just declared a emergency measure for ranchers and farmers.

It seems that issuing a permit to use precious waster recourses for a project like ISL uranium mining is most irresponsible, considering that the use and construction of nuclear power plants is in decline as we speak. Uranium energy is in decline!

The Inyan Kara water is usable if need be, with filtering, and so is the water in the Minnesula Aquafur . We cannot afford to squander this precious resource on a venture that surely will have irreversible negative devastating results for a large Area and population. Not mentioning the overall health of the environment.
